# The Student Activities Center Fitness Center

The Student Activities Center is a 62,000 square foot building designed with fun and activity in mind. The Department of Recreation & Wellness and the Office of Campus Life will share in the joint management of this new complex and look forward to providing a large amount of student programming in the new space. The building was conceptualized by the architects to bring the outdoors in and literally has a see through design on the west wing. The facility will have plenty of natural light and is also being constructed using a variety of natural and recycled materials. We invite you to use this wonderful facility and hope that you will consider making our new fitness center **YOUR** fitness center.
